Product Manager (m/f) PV Modules and ESS Storage Systems

Ref. Nr.: 472121

Das Unternehmen

Our client LG Electronics Inc. is a global leader and technological innovator of Consumer Electronics, employing more than 82.000 people in 81 subsidiaries around the world. LG is a global player in Home Entertainment, Home Appliances as well as in Mobile Communication, Displays, Air Solution and Solar. For our client we are looking for a "Product Manager (m/f) PV Modules and ESS Storage Systems"

Die Aufgabe

- Gives trainings to customers
- Visits installation sites if necessary
- Takes care of technical questions and reclaims
- Handles potential reclaims (including coordination of such issues with customers, LG Solar HQ Korea and other relevant LG Solar functions such as service or logistics)
- Monitor module and ESS market and technology developments and proactively informs HQ Solar about technological trends and current and future requirements of EU Solar Team
- Makes sure that all LG modules and ESS comply with regional laws and regulations and that necessary certificates are available on time (when new products are launched)

Ihr Profil

- Degree in Engineering
- Min. 5 years of experience in product management (ideally min. 2 years in ESS)
- Team worker
- Self-driven and self-motivated
- Enthusiastic and dynamic and ability to convince and motivate people within and outside the organization
- Excellent communication skills
- Goal-oriented
- Generally good understanding of technologies
